Hybrid

- Architected and delivered custom digital solutions for a diverse portfolio of small to medium-sized businesses (SMBs), ranging from high-impact brand presence sites to complex e-commerce platforms and food delivery management systems.

- Engineered end-to-end web applications utilizing modern CMS platforms and low-code tools including WordPress, Webflow, Squarespace, and Wix, ensuring responsive design and high-performance user experiences.

- Streamlined business operations for hospitality and retail clients by developing integrated management systems featuring automated order processing, real-time inventory tracking, and secure payment gateway integrations.

- Managed the full Software Development Life Cycle (SDLC), including requirements gathering, UI/UX design, development, SEO optimization, and production deployment, while maintaining direct stakeholder communication.

- Integrated third-party APIs and custom plugins to enhance platform functionality, including payment systems, marketing automation tools, and customer relationship management (CRM) software.

- Optimized site performance and accessibility across various web architectures, resulting in improved search engine rankings and increased user engagement for client businesses.

React.js, Angular and +18 skills

Front End Lead
AeraTech · Contract
Nov 2024 - Jun 2025 · 8 mos
London Area, United Kingdom · Remote

- Architected and developed a high-fidelity B2B cross-border payment prototype from the ground up, accelerating the product lifecycle from concept to alpha using React and premium Tailwind CSS components.

- Engineered a robust backend infrastructure utilizing Node.js, Express.js, and MongoDB, integrating specialized Python microservices to perform complex financial data analysis and reporting.

- Streamlined deployment workflows by establishing automated CI/CD pipelines, utilizing Firebase Hosting for frontend assets and Heroku for backend services to ensure continuous delivery.

- Developed a unified global financial dashboard for Multi-National Corporations (MNCs), providing real-time visibility into international financial standings and multi-branch liquidity management.

- Integrated Mastercard Digital Asset Solutions to provide institutional-grade liquidity, facilitating secure, cross-border fund transfers via internal blockchain-based cryptocurrency.

- Implemented an intelligent recommendation engine to advise MNC administrators on optimal transaction settlement strategies, reducing friction in moving capital across international borders.

- Led the technical strategy for a private, internal-only cryptocurrency ecosystem, ensuring secure value transfers and data integrity within the organization's global network.

React.js, Express.js and +5 skills

Software Engineer (Frontend)
Connectly.ai · Contract
Jun 2024 - Oct 2024 · 5 mos
San Francisco, California, United States · Remote

- Architected and spearheaded end-to-end feature development for an AI-driven conversational commerce platform using React, enabling B2B enterprises to execute high-volume marketing campaigns across WhatsApp, Facebook Messenger, and Discord.

- Engineered a scalable distributed architecture utilizing Go (Golang) and PostgreSQL, deployed and managed on AWS infrastructure to support high-concurrency messaging workflows.

- Integrated specialized Python microservices to implement custom data analysis and AI-powered tools, enhancing platform capabilities in campaign intelligence and automated chatbot training.

- Developed advanced analytics dashboards to provide real-time insights into messaging engagement, while leveraging Datadog for comprehensive logging, monitoring, and system performance tracking.

- Led a strategic architectural migration of the unified customer inbox from legacy Redux to Jotai, optimizing state management, reducing technical debt, and improving frontend responsiveness.

- Built AI-driven campaign managers and an integrated template editor, streamlining the creation and deployment of automated, custom-tailored messaging strategies for global clients.

- Collaborated on full-stack initiatives by developing high-performance API endpoints in Go, ensuring seamless integration between complex frontend requirements and backend microservices.

- Ensured mission-critical reliability by implementing rigorous unit and integration testing protocols within an Agile Software Development Life Cycle (SDLC).

React.js, TypeScript and +2 skills

Front End Lead
Tapistrii · Contract
May 2022 - May 2024 · 2 yrs 1 mo
United States · Remote

- Directed the engineering and architectural design of a high-scale Web3 social networking platform, enabling users to aggregate, verify, and showcase cross-chain digital assets and NFTs.

- Spearheaded a full-scale codebase migration from a legacy Angular architecture to a modern React/Next.js stack, significantly improving front-end performance, SEO, and application scalability.

- Engineered a proprietary multi-wallet authentication solution—developed prior to industry-standard tools like WalletConnect—facilitating secure account linking and discovery across multiple blockchain protocols.

- Led a distributed front-end engineering team, establishing rigorous coding standards, performance benchmarks, and automated testing frameworks to ensure high-fidelity UI/UX delivery.

- Developed high-performance blockchain data scrapers and architected a searchable NFT database, enabling real-time data ingestion and indexing of decentralized assets.

- Implemented sophisticated recommendation systems and discovery algorithms to deliver personalized content, including relevant Web3 assets, cryptocurrencies, and creator profiles.

- Optimized application performance through strategic micro-frontend architecture (Angular/React), reducing load times and enhancing the responsiveness of complex data visualizations.

- Collaborated with stakeholders and Product Managers to define technical roadmaps, provide accurate engineering estimations, and deliver project milestones within an Agile Software Development Life Cycle (SDLC).

- Managed cross-functional integrations between UI/UX designers and backend teams, ensuring seamless API communication and consistent design system implementation across all web properties.

Next.js, TypeScript and +11 skills

Front End Lead
Emerge · Contract
May 2022 - Sep 2023 · 1 yr 5 mos
Toronto, Ontario, Canada · Remote

- Served as a senior technical consultant for diverse client accounts, leading front-end engineering initiatives using Angular and React to deliver high-performance, scalable web applications.

- Drove full-stack project contributions by engineering robust backend APIs with NestJS and managing complex data structures using ArangoDB, ensuring seamless integration between client-side and server-side systems.

- Orchestrated requirements engineering by translating high-level business needs into comprehensive Software Requirements Specifications (SRS) and strategic development roadmaps for multiple concurrent projects.

- Managed end-to-end feature delivery, including technical design, cross-functional development, comprehensive testing, and API optimization to meet rigorous production standards.

- Collaborated closely with stakeholders to establish project timelines and technical milestones, ensuring all deliverables aligned with client expectations and organizational quality benchmarks.

- Streamlined the Software Development Life Cycle (SDLC) by resolving complex technical tickets and conducting thorough code reviews to maintain engineering excellence across various workstreams.

Node.js, ArangoDB and +9 skills

Senior Director of Technology
East Coast Digital Marketing · Contract
Jun 2022 - Feb 2023 · 9 mos
Orlando, Florida, United States · Remote

- Directed cross-functional technical departments, encompassing web engineering, UI/UX design, IT infrastructure, and digital marketing operations to ensure cohesive product delivery.

- Managed concurrent high-impact projects, overseeing the end-to-end Software Development Life Cycle (SDLC), including budget allocation, timeline management, and rigorous Quality Assurance (QA).

- Spearheaded client relationship management and requirement engineering, translating complex business needs into functional UI/UX designs and scalable digital products while managing stakeholder expectations.

- Supervised global offshore engineering and creative teams, directing full-stack software development, responsive web design, and social media content strategy.

- Architected and maintained enterprise IT infrastructure, managing cloud server environments, DNS/domain configurations, and automated deployment workflows for internal and client-facing applications.

- Enforced engineering excellence through regular code and Pull Request (PR) reviews, ensuring adherence to standardized guidelines across React, Angular, Node.js, and Express.js projects.

- Led technical recruitment and talent acquisition, interviewing and hiring diverse roles including Full-Stack Developers, SEO Analysts, and Content Strategists to scale organizational capacity.

- Delivered custom web solutions for a diverse client portfolio—ranging from healthcare and food service to non-profits—utilizing a versatile tech stack including React, Angular, Node.js, and WordPress.

- Optimized technical performance by implementing advanced networking solutions and SEO toolsets, driving system reliability and organic visibility for the company and its clients.

Bold Tech LLC Website

Skills: Node.js, Heroku, +19 skills

Frontend Developer
Dec 2020 - Mar 2021 · 4 mos

- Developed end-to-end features for diverse web applications using React, Angular, Express.js, and the Parse framework, ensuring seamless full-stack integration and high performance.

- Architected and documented scalable frontend solutions and technical workflows, providing clear roadmaps for complex project implementations.

- Automated deployment processes by configuring CI/CD pipelines on AWS, Heroku, and Firebase, significantly reducing manual intervention and streamlining production releases.

- Transformed high-fidelity designs from Figma, Adobe XD, and Canva into responsive, pixel-perfect user interfaces while maintaining cross-browser compatibility.

- Engineered Progressive Web Applications (PWAs) and hybrid mobile apps using the Ionic framework for iOS and Android platforms.

- Integrated in-app subscription models and managed the end-to-end submission and deployment process for the Apple App Store and Google Play Store.

- Diagnosed and resolved complex bugs across multiple legacy projects, improving application stability through rigorous testing and code optimization.

Lead Frontend Engineer
Up Pay · Contract
Apr 2020 - Jan 2021 · 10 mos
Sydney, New South Wales, Australia · Remote

- Architected and developed a responsive frontend application from the ground up using Angular, implementing automated CI/CD pipelines via AWS Amplify to streamline production deployment cycles.

- Engineered a robust backend architecture from scratch utilizing Spring Boot, managing end-to-end automated deployment workflows to AWS EC2 instances.

- Spearheaded the integration of Stripe Connect and advanced Stripe APIs across the full stack to architect a complex, vendor-based marketplace, enabling secure multi-party payment processing and vendor management.

- Translated high-fidelity Figma and Adobe XD designs into pixel-perfect, responsive UI components, ensuring a cohesive and intuitive user experience across all Progressive Web Applications (PWAs).

- Optimized the Software Development Life Cycle (SDLC) by establishing standardized practices for development, automated testing, and deployment of enterprise-level internal tools.

- Led technical workshops for engineering interns on modern web standards and conducted rigorous code reviews to maintain high standards of code quality, consistency, and maintainability.
